Dr. med. Simone Bertoglio

Specialist in orthopaedic surgery and traumatology of the locomotor system, FMH member

Languages

IT,FR,DE,EN

Competences

- Prosthetic hip surgery (primary conventional with mini-invasive 'bone sparing', double mobility and revision implants)
- Knee prosthetic surgery with customised PSI (Patient Specific Instrumentation) system; the knee is analysed with a CT scan and, after 3D computerised assessment, customised guides are obtained that optimise the precision of the cuts, the final position of the implant and the operating time
- Prosthetic knee revision surgery
- Prosthetic shoulder surgery (total reverse prosthesis)
- Treatment of prosthetic infections
- Traumatology of the appendicular musculoskeletal system (hip, knee, shoulder and elbow)
